

Tips on address and destination settings

Abbreviated state name input

You can set the state or province by entering its standard 2-letter abbreviation (e.g., NY for New York).

Smart matching

By entering just the first few letters of a street, city, state or POI (Points Of Interest) name, matching destination list will be generated after touching "Done."

City name input

To save time, you can skip city name input.

Simply touch "Skip" in the city name input display to show all matching destinations.

If you want to narrow down the destination list, enter the first few letters of the city name, then touch "Done."

Intersection search

When selecting an intersection as a destination, please be advised the streets searched must be major roadways.

If the intersection is not found, try a busier intersection nearby.
